Microneedling Facial

Includes 4 sessions. Treatment begins with a double cleanse and 30-minute topical numbing. Microneedling is performed on the face and neck, followed by a hydrating mask, LED light therapy to calm the skin, and finished with an intensive recovery cream.

Dermaplaning

The skin is prepped with a double cleanse, our medically trained aestheticians use a sterile, surgical blade to gently exfoliate the skin and remove vellus hair (peach fuzz). A sheet mask is applied to the face followed by serums and moisturizer tailored to your skin's needs.

Advanced Micro-Exfoliation Facial (Dermaplaning + BT Titan)

Combines multiple exfoliation methods for smooth, radiant skin. Includes a double cleanse, dermaplaning, and BT Titan nano-infusion. A hydrating mask and LED light therapy follow. Finished with peptide-rich creams and calming moisturizer.

Best for: fine lines, wrinkles, hyperpigmentation, texture, and product absorption.

Not recommended for first-time clients. No downtime.

Acne Deep Cleansing Facial

Starts with a double cleanse and enzymatic exfoliation under steam. Includes extractions, high-frequency treatment, and a light salicylic or lactic peel. Oxygenating mask applied, followed by blue LED light therapy, acne serum, and clarifying moisturizer.

Best for: acne-prone skin, congestion, excess oil.

Sensitive / Rosacea Facial

Begins with a gentle foaming cleanse and light enzymatic exfoliation. Includes mild extractions (if needed), facial massage, cooling ice globes, and a soothing Phyto Corrective mask. Finishes with epidermal repair cream. Best for: sensitive, reactive, redness-prone skin, compromised barrier.

Anti-Aging Firming Facial

Features a double cleanse followed by exfoliation using dermaplaning or a light chemical peel based on skin type. Mild extractions as needed. A collagen firming mask is applied to the face, finishing with targeted serums and moisturizer. Best for: fine lines, wrinkles, sagging, and loss of firmness.

Brightening Facial

This facial includes a double cleanse, manual exfoliation, steam with enzymes, and extractions with high frequency. A gel peel is selected based on skin type. Includes facial massage with targeted serums, warm mitts, hot towels, and finishes with customized serums and hydration creams.

Lifting Facial (Springfield Only)

Begins with a double cleanse, followed by a lifting treatment using the TriLift™ by Lumenis. A cellular enzymatic mask is applied to exfoliate and brighten. While the mask sets, enjoy a relaxing arm and hand massage. Finished with hot towels, serums, and moisturizers tailored to your skin.
